Jimmy knew exactly how to fix my kitchen sink drainage problem. He replaced a clogged, galvanized steel pipe with PVC, re-pitched an existing PVC pipe and replaced an outdated P-trap with a Y drain connection. Water now drains easily in my kitchen sink. Needless to say, this was a very messy job as it involved years and years of accumulated grease and food waste. Jimmy left the work site cleaner than he found it. I have used Rocket Plumbing in the past and will continue to do so in the future. They never disappoint.

Great work done in a commercial place. Fixed everything a different plumber couldn't.

What a blessing Rocket Plumbing was to our house! They were able to help us when other companies would not. We had a plugged sewer line and they were able to come and assess the situation in a timely manner. They were extremely respectful and knowledgeable, and thoroughly explained the problem. They were even able to show us the clog with their camera images. We were impressed at how quickly and efficiently they worked with their hydro jet system to clean out the sewer clog. We know who we are going to call for any future plumbing needs! Thank you, Mike!

A+ service. Rocket made a potentially unpleasant experience easy. My water heater was leaking, needed replacement. I received a return phone call 30 minutes after leaving a message at Rocket, and scheduled an appointment for an 8-9am window the next morning. Ryan and Ze arrived at 8:00am sharp, we discussed a quote and they left to go buy a water heater. Several hours later they were DONE, new water heater installed. Ze and Ryan were professional and courteous but also personable and friendly. I am very satisfied, intend to use Rocket again the next time I need plumbing work.

CLEAN, COURTEOUS, & PROFESSIONAL. Main drain line was clogged with tree roots. Called Rocket Plumbing and they hurried over to help me out. They fixed the problem in less than a day. Expert plumbers, great office staff, unparalleled service, LOW PRICE, and financing available. I recommend Rocket Plumbing to all whom require service and am grateful to have called myself. Regards, E.

After nine years, my water heater finally collapsed. I got in touch with four plumbing companies and went with Rocket Plumbing because I had a good feeling about them from the get-go. Although their quote was (slightly) higher, the manager made a considerate accommodation on my behalf, which I appreciate. I am glad I went with them because the work was superb. I would like to thank specifically Derrick, the Customer Service manager, Fred, who supervised the job and dropped by my place to make sure everything went smoothly, which it did, and especially, Luis and Mike, who did the actual work. I will use Rocket Plumbing for my all of my needs from now on, particularly the drainage that I should have done once a year to help prolong the life of the tank. Thank you. A+++.

We have had a clogged sewer pipe for over 2 years. I can't tell you the number of plumbers we had come out to try to fix the issue and they just couldn't get all the root balls out. Others tried to scare us into spending thousands. Mike came in and got all 4 root balls removed in about 3 hours and restored flow out to the main sewer. While I know it was a difficult job, he patiently walked us through everything he was doing and videoed along the way. He did what no one else was able to do for us at a VERY reasonable price. I can't recommend enough!

It was time to get a new water heater so I called Rocket Plumbing to get a quote. From the initial visit to give me an estimate to the actual installation, it was A++ service. Very knowledgeable, nice and efficient plumbers. And some code issues from the old installation were corrected. Cannot say enough good things about Sam and Luis's work.
